We're the she visitors 1984 ,planning to eat Daniel Bernstein all along?

The Visitors in **V: The Final Battle (1984)** intended to harvest humans for food, and Daniel Bernstein, a human collaborator, was ultimately sent to be processed as food by the Visitors.[1][2]

The overall plan of the Visitors involved conquering Earth, stealing its water, and harvesting humans as a food source—leaving some alive only for slavery or military use. Daniel Bernstein was a notorious collaborator and member of the Visitor Youth, betraying his neighbors and participating in violent acts, including the murder of Ruby Engels, a resistance spy. His fate was set after rebels framed him and, in retaliation, Visitor leader Steven ordered Daniel to be sent to be "processed as food".[3][2][1]

There is no explicit on-screen depiction of Daniel being eaten; however, based on the series lore and the fate of those "processed as food," it is reasonable to infer he was killed for consumption by the Visitors.[4]

Key details:

- **The Visitors did plan to eat humans all along**; this was a central element of their invasion strategy.[1]
- Daniel Bernstein was **not specifically targeted for consumption from the outset**, but as a traitor and after being framed, he met this fate.[2]
- The series never shows or confirms Daniel’s actual death by consumption, though it is strongly implied.[4]

⁂

What evidence suggests the she visitors wanted to eat Daniel Bernstein all along

There is no direct or explicit evidence in the series "V: The Final Battle (1984)" that the Visitors specifically wanted to eat Daniel Bernstein "all along." Here’s what the series establishes:

- The Visitors’ overall plan was to eat humans; this was a well-known part of their hidden agenda from early in the story.
- Daniel Bernstein was not singled out from the outset as a human specifically destined for consumption. He was initially recruited as a collaborator and given privileges in exchange for his loyalty and betrayals of others.
- Daniel’s fate to be "processed as food" comes after he loses favor with the Visitor leadership, particularly after being framed by the resistance and following Visitor leader Steven's decision. This occurs late in the narrative rather than as part of a long-running plan targeting Daniel specifically.

The show’s narrative focuses on Daniel’s role as an opportunistic collaborator whose eventual punishment (being sent to be processed as food) is more a result of his actions and circumstances, not a pre-determined Visitor plan targeting him from the beginning. Thus, there is no storyline evidence that the Visitors intended to eat Daniel Bernstein "all along"; his fate was determined by evolving events rather than an original, specific intention.

⁂

How do the visitors' interactions with Daniel Bernstein compare to their behavior with others

The Visitors' interactions with Daniel Bernstein in "V" are distinct compared to their general behavior toward other humans:

- **Daniel Bernstein as a Collaborator:** Unlike most humans, who were viewed primarily as subjects to be controlled, exploited, or harvested, Daniel was actively courted as a collaborator. He was given privileges, status, and responsibility within the Visitor-run hierarchy because of his willingness to betray his fellow humans in

exchange for personal gain. This special treatment was conditional upon his continued usefulness and loyalty.[5]

- **General Human Population:** Most humans were treated impersonally as a resource—either as food, slave labor, or subjects to be manipulated through propaganda and coercion. Collaborators like Daniel were a minority; most people were subject to suspicion, oppression, and brutality by the Visitors.
- **Fate of Collaborators:** While Daniel initially received favor, his privileges vanished once he lost value or became problematic for the Visitors. Ultimately, he was sent to be "processed as food"—an outcome typically reserved for the rebellious or expendable, illustrating that the Visitors' loyalty toward collaborators was pragmatic and could turn to lethal indifference when convenient.[6][5]
- **Moral Dynamics and Manipulation:** Interactions with Daniel were used by the Visitors to manipulate and divide the human population, rewarding treachery and punishing resistance, whereas their broader interactions with humanity were far more uniformly predatory.[6]

In summary, Daniel Bernstein's treatment was marked by temporary privilege and unique opportunities because of his collaboration—a stark contrast to the Visitors' generally exploitative and impersonal behavior toward the rest of humanity. However, his ultimate fate reinforced that no human, not even a favored collaborator, was safe from the Visitors' underlying agenda.
